Art Unit: 3662

1. Claims 8-16 are allowable over the prior art of record.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hodson ('860).

With respect to the limitations of independent claim 1, Hodson ('860) determines the location of an object by at least one sensor, determines the amount of space in which the object is probably present, and displays the probabilistic area in which the object is to be found. Please note the Abstract of Hodson ('860).

The further limitations of dependent claim 2 is met by Hodson ('860) in that these merely mean that an area of uncertainty is defined such that there is a probability of 1 that the object is somewhere within that area of uncertainty.

The further limitations of dependent claims 3-7 are fully met by Hodson ('860) as being inherent in the computations necessary to accomplish the disclosed functions in Hodson ('860).

With further reference to the further limitations of dependent claim 4, the division-by-zero error would be inherent in the processor of Hodson ('860), as it would be in any modern digital processor.

The examiner-cited prior art that has not been applied above is of general interest for showing the state of the related prior art.
